CASE STUDY · FREELANCE SUPPORT

Website Migration, Rebrand & Blog Launch

Moving a multi-blog affiliate site to GoHighLevel and taking it live

ROLE	TYPE	PLATFORM	STATUS
CRM & Marketing Ops	Freelance support	GoHighLevel	Live

OVERVIEW

An established affiliate site on an older platform needed a fresh start. The team migrated its pages, blog and contacts into GoHighLevel, rebranded the whole website, launched a second blog, connected both domains and checked everything before going live.

AT A GLANCE

7	39	7	44	10-11
core pages migrated	live blog posts migrated	blog categories	posts on the new blog	contacts imported

WHAT WAS DELIVERED

01 Website migration
Home, services, about, contact, blog, 404 and thank-you pages rebuilt in GoHighLevel.

02 Legacy blog migration
39 live posts across 7 categories moved, with their Amazon affiliate links re-added.

03 Full rebrand
New look and navigation across the whole site, fully responsive on mobile and desktop.

04 New affiliate blog
A second blog with 44 posts across multiple categories, each with affiliate links.

05 Domains & DNS
Main site and blog domains connected, with DNS records added in Cloudflare.

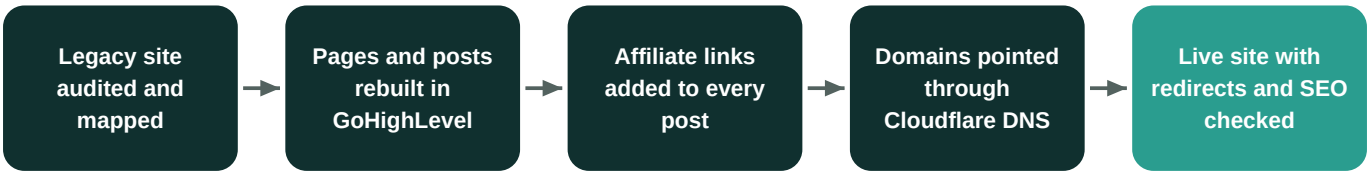
06 SEO & tracking
On-page SEO for every page and post, plus GA4 tracking across the site.

Client and brand details withheld.

CASE STUDY · WEBSITE MIGRATION

How the migration came together

FROM LEGACY SITE TO LIVE LAUNCH



BEFORE AND AFTER

BEFORE

Older design on a previous platform, a small set of pages and one blog with 80+ posts and drafts.

AFTER

Rebranded, responsive site on one platform: core pages, the migrated blog (39 live posts) and a new blog (44 posts).

TECHNICAL SETUP AND CHECKS

- Added DNS records in Cloudflare and connected both the main and blog domains.
- Checked that redirects work for every page, button and navigation link.
- Wrote SEO titles and descriptions for all pages and blog posts.
- Installed GA4 tracking across the site.
- Tested the responsive layout on mobile and desktop.
- Imported the existing contacts into the CRM.
- Left six outdated legacy pages out on purpose, replaced by the new design.

OUTCOME

The rebranded site and both blogs are live on the connected domains, with tracking, SEO and redirects in place.

Strategy, content and product research belong to the client and are not shown.
