CASE STUDY · FREELANCE SUPPORT

Assessment Quiz & Personalised Email Automation

Quiz, results page and conditional email logic built end to end in GoHighLevel

ROLE	TYPE	PLATFORM	STATUS
CRM & Marketing Ops	Freelance support	GoHighLevel	Final testing

OVERVIEW

The goal was an assessment that turns each respondent's answers into a tailored experience. The build lives in GoHighLevel: a single landing page, a quiz, a native results page and a workflow that assembles each follow-up email from conditional content blocks.

TOOLS USED

GoHighLevel · Quiz / survey · Custom fields · Workflows · Conditional email

WHAT WAS BUILT

01 Single-page landing
One focused page in GoHighLevel linking to the assessment.

02 Assessment quiz
Multi-question quiz, with each answer saved to a custom field.

03 Results page
Built with GoHighLevel's own feature and shown straight after the quiz.

04 Scoring logic
Calculated fields for category averages and an overall total score.

05 Conditional email workflow
IF/ELSE branches show or hide email blocks by score, answers and audience.

Client and brand details withheld.

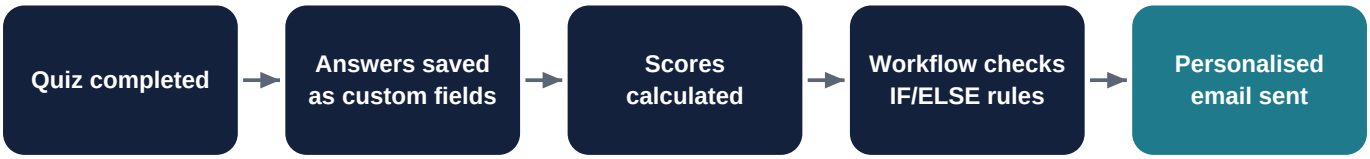
How the personalisation works

QUIZ TO PERSONALISED EMAIL



WHAT DECIDES EACH EMAIL BLOCK

Overall score band
sets the tone of the intro

Individual answers
trigger topic-specific blocks

Audience segment
selects the wording version

Readiness level
chooses the next-step block

PROJECT STATUS

DONE	IN PROGRESS	NEXT
Landing page, quiz, results page, scoring and workflow logic.	Final email build and end-to-end testing.	Handover to the client.

OUTCOME

Each respondent receives a results page and an email that reflect their own answers, all driven by one automated workflow inside a single platform.

Strategy, content and copy belong to the client and are not shown.
